Harris Walker Wins Honors in Pole Vault

(By Howard Forsyth)

After two years of effort, Harris Walker, well-known Raymond athlete won the right to wear a blue Y sweater of the Brigham Young University when he tied for fifth place in the pole vault in the Rocky Mountain Conference final track meet at Denver, Colorado May 26.

Harris vaulted twelve feet George Gourley of Pleasant Grove, Utah, a team mate of Harris, won the event with a vault of over thirteen feet. The Brigham Young university team won the meet by a wide margin with what was perhaps the strongest track team the R.M.C. has ever produced. They scored 66½ points against 42 for second place winners. Only twice have larger scores than that been chalked up in the western conference, and those were times of easier competition. Colorado University finished second. Colorado Aggies third. Utah University fourth and Denver University fifth. Several other universities competed.

In the broad jump, which was won with a leap of over 23 feet, Harris missed winning an award by five inches, jumping 21 7/8. A fifth place in the conference meet is necessary for placing. In dual meets an athlete must win a first, and in state meets a first, second, or third. In two years of competition, mainly in the pole vault and broad jump, Harris has never before won a place, although coming within inches many times.

News Notes

Reserve Saturday June 9th. FREE Chest COMMUNITY PLATE Silver Given away.

J. V. Johnsen of the Great West Distributors was a business visitor in Raymond last Tuesday.

If you have not tried Nevv Nox Gas, you should give it a trial. It is making new friends every day. See D. A. Watson.

Many farmers of the district took advantage of the free oil which was flowing at the scene of the train wreck near New Dayton over the week end, and replenished the supply of tractor fuel. All sorts of containers were used to gather up the liquid. Visitors to the scene said it was a slick mess and no mistake.

Raymond and Earl Bascom will be leaving about June 12th for a trip to Toronto where they will help entertain the Beatty Washer Co. salesmen and officials in a two day exhibition of riding, roping, decorating, etc. They will return toward the end of June and will be here for the Southern Alberta Stampedes.

"The FIRESIDE PHILOSOPHER"

By ALFRED BIGGS

When honor goes, all is gone.

Don't do it if you can't do it right.

If it isn't the truth, don't repeat it.

A good life is better than a long one.

Prudence and haste can't live together.

Good health, plus good sense make a fair life.

There's more greatness in goodness than goodness in greatness.

Peasants and plutocrats are equal in death.

CONDITIONS MIGHT BE WORSE — SO

When y' get up in the morning with an ugly sort o'grouch. Forgetting in the pleasant dreams that hovered 'round yer couch;

When y'd like t' kill yer neighbor, an' upset th' world that is An' put yer brother merchant man completely out o' biz— Jest remember, you're an atom in this great big universe An' thank yer Lord that you're alive — conditions might be worse.

When y've got t' patch yer britches that y' wore last year an' try t' scrimp an' save, an' dig an' slave, in order t' get by;

Jest remember that yer Daddy, an' his Dad ahead o' him Found pickin' for their livin' at times most awful slim, So quit yer kickin' brother, an' sing instead o' curse — Yer life can't all be sunshine — conditions might be worse.

When y' fail t' make a "home run" in the puzzling game o' life,

An' yer strength seems all too little fer to battle 'gainst th' strife

When yer feelin' blue an' lonely an' y' don't know where t' steer

For t' find some true companion who will drive away yer fears— Jest remember there are other fellows, who are ridin' in a hearse

Who'd be glad t' have yer chances — conditions might be worse

News Notes

Piano tuners from Lethbridge were here Monday and Tuesday of this week fixing up a number of local instruments.

Unemployment in Canada has been decreased by 140,000 since May of 1933 according to statistics just released.

Lightning and thunder Friday night looked like storm but no rain fell in Raymond district to amount to anything.

Born to Mr. and Mrs. Reg Cooper, Saturday, May 26th a ten pound baby boy. Mother and son are doing fine, and "Reg" is the proudest daddy ever

Spencer and Katherine Grod and Retta Cocks, all of Caledonia are graduating from the B.Y.U. this coming week. Raymond has several students who will be in the graduation exercises in the next two years.

During the thunder show on Saturday, the Mercantile delivery team driven by "Butler" Nalder got away and went for a run breaking the double tree and a strap or two on the harness. No one was injured.

N. S. Stoltze, prominent Rotarian and business man of Lethbridge was elected Governor of the fourth district Rotary, and this is a distinct honor to Southern Alberta in which all Rotarians will rejoice.

The marriage of Mr. Wm. E. LaPearle, of Salt Lake City, and Miss Arilla Rolison, daughter of Mr. and Mrs. F. B. Rolison of Raymond, was solemnized in the Salt Lake Temple, Thursday, May 24th. The young couple will return from their honeymoon to make their home in the States.

Mrs. V. B. Redd Passes Away

Mrs. Mary Redd, mother of the Redd children here, and a highly respected and loved pioneer woman of Raymond passed away at her home Wednesday morning at 7 a.m., after a stroke which she had Saturday morning last had left her in a state of coma during the intervening time. She had her first stroke about three years ago and had several attacks of a lighter nature since, the one Saturday being a very severe one, and causing her death. The end came peacefully in the midst of her children who are living here in Raymond.

Her husband passed away several years ago, and since then she has made her home with her son William and family.

Funeral arrangements are not complete as yet, pending definite information from the children in the States as to whether they will be able to attend or not. Services may be held Friday afternoon at 2 p.m. in the Stake House here.

The surviving children are: William, Paul and Kay, of Raymond, Mrs. George Laycock and

Mrs. O. W. Ursenbach of Lethbridge, Lura, Pauline, Lyman and Mary, who all reside in the United States.

News Notes

Remember Ladies Dinnerware Night next Monday.

F. R. Taylor is driving a new 1934 Pontiac, and seems to be enjoying wearing the new off it

Mr. and Mrs. Roi Stone were Lethbridge visitors early Wednesday morning.

Morris, in Southern Manitoba reported 105 in the shade on Wednesday. That would be some hot, eh what?

G. E. C. Patterson, lawyer, of Lethbridge, was the holder of the lucky ticket in the draw for the Golf Clubs at the Capitol Theatre on Tuesday night. A number of other prizes were also distributed and everyone present greatly enjoyed "Gallant Lady."

WEEKLY LETTER

SWARM CONTROL

Bee colonies through southern Alberta have built up very strongly this spring according to S. O. Hillerud, provincial apiarist, owing to a relatively heavy spring nectar flow and weeks of storm-free weather which have favoured brood rearing to an unusual extent. As a result colonies are away to a good start for a successful season.

There are, however, a number of possible pitfalls ahead and of these swarming is probably the most menacing to success. Swarm control is in fact considered the most menacing to success. Swarm control is in fact considered the most important and at the same time difficult problem in apiary management. The problem is important since extensive swarming invariably restricts and often entirely prohibits the storage of surplus honey and its solution is difficult to work out because the urge to swarm is so deeply rooted in and so closely related to the whole life of the colony. The mysterious force that actually causes the old bees of a colony to swarm out in almost marching formation is still somewhat of a hidden secret yet the main cause of swarming we know to be congestion in the brood nest.

The worker bees may be divided into three main groups. (1) The nurse bees 3 to 12 days old, (2) the house bees or wax workers from 12 to 18 days, and (3) the field bees which include all bees over 21 days old. The bees which decide when the colony is to swarm are supposedly the wax workers or the bees between the ages of 12 to 18 days. Now the field bees, whenever in the hive, occupy the lower and front part of the combs. If owing to unfavourable weather or a lack of rearing the field bees are forced to remain in the hive they are often crowded over the cells containing unsealed brood with the result that

the nurse bees are interested with and the house bees or wax workers take this as a signal it seems to start building queen cells. Once the swarm urge has started it is exceedingly difficult to check; even if the actual issuing of the swarm is prevented the bees tend to loaf more or less and the spirit of activity that reigns in a contented hive is to a large extent lost.

Congestion, the main cause of swarming, may be due to poor combs which are of no use to the queen, to a lack of room for egg laying or honey storing, to heavy rims of sealed honey above the brood which some queens regard as barriers and refuse to pass, or in queen excluders plugged with wax through which bees have difficulty in passing or to old dry fountain which the bees refuse to work.

In addition congestion may result if, as already explained, the worker bees are confined to the hive through unfavourable weather or lack of nectar which frequently occurs during the first part of June after spring nectar flow is over and before the main flow starts. This is a critical period when the future of the colony and the amount of surplus honey gathered may to a large extent be determined by skilful manipulation. The object must be to keep the swarming urge from developing so that a spirit of contentment is maintained in the hive and the working bees will be in readiness to go to the field in full force at start of the main honey flow towards the end of June. With this in view three rules at least are observed by the beekeeper in making the early June examination. (1) Any colony with seven frames of brood and ten frames of bees are given a second brood chamber, (2) any colony with 12 or more frames of brood in all stages in which queen cells are found are weakened by making increase and, (3) Supers are added when the previous super given is from one-third to one-half full.

Big Circus Is Coming In Near Future

News Notes

Funeral services for Mrs. M. V. Redd will be held in the Stake House at 2 p.m. Saturday.

Magrath is holding a big Golf Tournament, Sunday June 3rd, and all local golfers are invited to participate.

Cool weather as we go to press is saving the fields from damage from sun and wind, and prospects are good for a good soaking rain.

Do not miss the double feature at the Capitol Friday and Saturday. Geo. Raft in "The Trumpet Blows" and "Devil Tiger."

When summerfallowing try Red Distillate, a product of B. A. Many unsolicited remarks have been handed us regarding the quality of this tractor fuel. D. A. Watson B. A. Agent.

Born to Mr. and Mrs. Hyrum Fromm a baby girl last week. Mother and child are doing nicely, and Hyrum is proud as a peacock.

Mr. and Mrs. J. F. Atterton, their daughter Ivy and her husband, the latter two of Salt Lake City, were Sunday visitors at the home of Mr. and Mrs. Frank Atterton.

Mr. and Mrs. Alma Hancock were Lethbridge visitors Sunday where they visited Stanley Cook who is in the Hospital there. They found him improving steadily, but still a very sick man.

Mr. VanWagener, known to many Raymond people, and an old-timer of the district, passed away in Los Angeles on Saturday morning last according to word received by D. L. Galbraith.

Red Deer had a hail storm and cloudburst of rain Wednesday afternoon which did minor damage to gardens in spots, but did not damage grain field and the moisture was very welcome to the farmers.

In the opening league game of the Baseball season Wednesday evening last, Raymond took the long end of a 10-1 score from Stirling. The evening was decidedly cool and only a small gallery of fans was on hand to witness the game.

Amongst the list of nurses graduating this year from Gal Hospital in Lethbridge, is the name of Miss Beatrice Card Raymond. We congratulate Miss Card on her success in her chosen profession.

K. D. Johnson, old-timer of Lethbridge, predicts rain for June as a result of the thunder heavy since he was 12 years old and states that weather repeats itself, and that this is the year for good moisture and a bountiful crop.

Good progress has been made in the installation of the water line running east from Broadway past the home of Arthur Dahl, Milton Strong, and down the other street past the homes of W. H. Fairbanks and the Catholic Church Manse.

Erle Eishenauer on his return from Winnipeg said it was good to be back in Southern Alberta as crops looked better than anywhere on the road, and the south half of Saskatchewan, according to press reports is nothing but a barren wilderness.

GLAMOR OF CIRCUS POSTERS SEIZES KIDDIES IMAGINATION

BOLIVAR THE HUGE ELEPHANT AND DIXIE WHITAKER

Get ready! The Circus is coming! The A. G. Barnes show one of the world's largest, will exhibit in Lethbridge on Thursday June 14.

Three special trains are used this season to transport this great organization from city to city. Travelling with the great organization are 1,080 employees in addition to 108 advance men. Twenty-two tents covering twelve acres of ground house the transient city in the daytime. The circus has its own doctor, lawyer, dentist, U. S. postman, detective, blacksmith, carpenters and, in fact, every artisan in the average small city.

The famous A. G. Barnes menagerie, declared to be the finest and most complete travelling zoo in the world, is a part of the show. Many new, rare and costly specimens of the wild animal kingdom have been gathered from all parts of the globe. Tigris, gnus, Vlack Varks, lions, tigers, camels, dromedaries, zebras, leopards, panthers, yaks, emus, jaguars, elands, seals, and three herds of elephants are but a part of the travelling university of natural history.

The wonder spectacle of all time, the "Fiesta of the Rio Grande," a gorgeous procession of old Spain, is used this season as a prelude to the circus proper. More than 1,000 men, women, horses, camels and elephants take part in this never-to-be forgotten pantomime of enchantment. Upwards of \$70,000 was expended on the wardrobe. The mighty audiences which daily greet the magnificent production are among the largest that have ever been drawn together in the history of the amusement world.

Great stars from eighteen foreign countries, the respective champions in their line, participate in the gigantic display of arenic numbers. The trained wild animals display, are herded by Miss Mabel Stark, John Myers and Capt. Terrell Johnson. In massive steel girders, lions, tigers, jaguars, and all subjugated by master trainers. Forty dancing horses and forty dancing girls will be seen in a horse show unparalleled. Among the sixty equestrians will be "Poodles" Hanneford, the riding clown, and the Hanneford family of equestrians. The petite and charming Esther Escalante intrepid aerialist comes from old Mexico to thrill and amaze you. From Europe will be the amazing Flying Clarkons, international aerialists. Sixty clowns will furnish fun for the little folks.

Performances will be given at 2 and 8 p.m. Doors will be opened an hour earlier to permit an inspection of the zoo or to enjoy a concert of popular and operatic music by Prof. Redrick and his military band.

Don't forget that Raymond will be looking for you on Dominion Day. The Stampede and celebration is a movement that certainly deserves the support of every loyal citizen of the town and district.

3 kiddies, aged 11, 8 and 7 were burned to death, and the mother seriously burned in attempting to rescue them when coal oil was used to start the kitchen fire in an effort to hurry it along.

What About Social Credit in Canada?

This series is an explanation of the Douglas Social Credit Plan. Mr. Williams, (W.) a Social Credit advocate, is explaining the plan to his friend, Mr. Jones (J.). The scene is Mr. Williams' home, and the conversation takes place during an evening visit.

By following this series to the conclusion the reader will clearly understand the problem which faces Canada.

NO. 16.

J. "Well, what about the national dividend?"

W. "It must form an integral part of any proposal for the solution of our economic problem, and I want you to see clearly the necessity for the use of such a device."

First, on economic ground.

You know that labor saving machinery is installed for just what the term implies — that is, to save labor and labor costs. If a machine cost as much as workers turning out the same amount of goods, no employer would bother to install machinery. The dismissal of unwanted workers results in the distribution of less purchasing power for these men get no wages. There is therefore a lessened demand for the products of industry, for these men, receiving no money, cannot buy what the machine makes. Now some bright people will tell you that the amount thus "saved" by the manufacturer will be paid out in dividends so that there is no shortage — it is distributed to the rich, or at least to the shareholders of the industry. If this were a fact it would mean two dividends were distributed before goods were sold and I think any person who has even the most rudimentary knowledge of our industrial system will recognize that profits come from the sale of goods, and that unless the goods are sold, there can be no question of any profits in the form of dividends to be distributed.

So if our economic machinery is to function we must distribute these "wages of the machine" to the Community and make up the deficiency in purchasing power. If we do not do this it will be necessary to restrict the use of machinery, or else to see the ranks of the unemployed continually increasing in number and in intensity of destitution. So that you can see that from the standpoint of merely economic adjustment some form of distribution of money must take place.

J. "Well, if you put it that way I suppose one is driven to agree, but I know that you will encounter a great deal of opposition regarding the idea of getting something for nothing."

W. "Perhaps. But the opposition will either vanish or be forced to show its unreasonableness when the normal basis of such a dividend is explained. Have you ever considered the real source of this increased ability to produce?"

J. "Well, no; not exactly."

DID YOU EVER STOP TO THINK?

Edson R. Waite
Shawnee, Oklahoma

It doesn't pay to be known as a city of DON'TS.

The chief idea of progressiveness in some cities is to prohibit this and to prohibit that.

The fact that something is thought necessary by the majority is regarded by the minority as sufficient reason for attempting to stop it.

Because some people don't like proposed projects, they think they should be stopped; because some people want public improvements, others say they should be delayed.

THE GREATEST HINDRANCES TO THE DEVELOPMENT OF A CITY ARE THOSE BUSHY-BODIES WHO SPEND THEIR TIME OBJECTING TO THIS AND OBJECTING TO THAT. IF THIS CLASS OF PEOPLE WOULD STOP SAYING "DON'T" AND WOULD TURN FROM OBSTACLES INTO CONSTRUCTORS, WHAT WONDERFUL WORK COULD BE DONE!

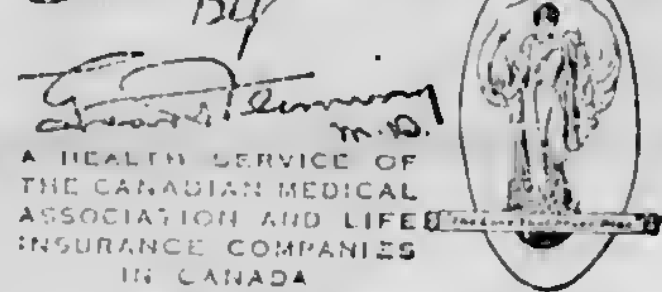

TWO ACCIDENTS

"Go down to James Street and get the dope on this explosion," said the editor to his cub reporter. "And when you write your story, keep it brief. Boil it down to the net facts."

A few hours later the cub landed in this: "John Smith at the cotton mill wanted to speed up the engine. He screwed down the pop valve on the boiler. Age 41."

And on another occasion: "Rastus Johnson accidentally drove his car in a parade of the Ancient Order of Hibernians. He would have been 39 years old next September."

HEALTH

FAT OR THIN

Hippocrates the father of medicine said "Largeness of person in youth is noble and not becoming; but in old age it is inconvenient and worse than a smaller stature." From this it is evident that overweight and underweight are not new problems and that while styles may change and tastes differ, medical opinion has been consistently in favour of the young and plump and the old and thin.

This attitude of medical science is not an expression of artistic taste, nor has it any aesthetic basis. It is the cold unromantic truth that slight overweight in youth is a health asset whereas it becomes a liability after forty.

General statements must not be interpreted literally in their application to individuals. There are, at all ages, those who are slightly above or below the average weight and who are, at the present time in good health. In such cases, there is no cause for worry, nor is there any reason for attempting to increase or lower weight.

When the variation from the average is marked, then it is well to consider the subject, not with alarm but simply to find out if there is any abnormal condition responsible or if it is a question of diet.

Weight is not dependent upon diet alone. If a person eats too much he will put on weight and if he eats less than his body needs he will lose weight.

Postage must be enclosed if a reply is desired.

ALBERTA NEWS BULLETIN

Issued by Publicity Commissioner, Government Buildings, Edmonton, May 11, 1934.

Reports of rain this week throughout many districts of the province have been received. They have been fairly heavy in some districts in Southern Alberta where they were very welcome. Crop conditions this week continue normal, with considerable benefit from the rains. Grasshoppers are hatching, but if cool wet weather continues the hopper menace will be retarded to some extent.

ANNUAL FEEDERS' DAY

The 13th annual feeders' day under the auspices of the animal husbandry branch of the university of Alberta will be held on Saturday, May 26, commencing at 10:30 a.m. The programme will include a discussion of the results of tests made during the year in connection with cattle, sheep and swine feeding. Six groups of cattle fed on various rations since November will be finished and on exhibit. Swine feeders will be interested in the response of several groups of hogs to different grains, singly and in combination, as well as the influence of protein and mineral supplements on economic production. Further study has been made in the use of skim-milk substitutes for raising dairy calves and the sheep men will hear something with reference to lamb production. Space is being provided on the programme this year for brief discussions on sheep and swine diseases and problems of special interest at this time in connection with cattle and swine marketing.

HEAVY DEMANDS FOR TOURIST INFORMATION

There is an exceptionally heavy demand for tourist literature this spring at the provincial publicity bureau which is taken to presage an increase in tourists to the province. A new tourist booklet together with a revised and extended tourist map and guide is issued and being distributed through travel agencies and tourist bureaux throughout the continent. The provincial government has also been asked to present its views on tourist traffic development to the senate committee at Ottawa.

COAL PRODUCTION

Coal production in the province

There is also involved the question of the proper digestion and utilization of the foods that are eaten. This is linked up with all the hygienic habits of life.

Children who are definitely underweight are usually children who do not secure sufficient rest. Their diet may be faulty and they are likely poor eaters. No one eats well when tired and added rest will do more for many of these children than anything else. It should be said that children of this group seldom complain of being tired; indeed they are usually active and always ready to "go places and see things."

Adults who are overweight have, in general, added weight because they continue to eat as much, and likely more, as they did when leading active physical lives. In general, it is true that definite overweight in adult life is a physical handicap. There is a preference for the fat and jolly Falstaff rather than for Cassius with his "lean and hungry look." Nevertheless, the expectation of life for Cassius was no doubt better, and we are not convinced that overweight is a necessary accompaniment to good humour and it is certainly not to good health.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

Ladies Hats

New Shipment Just In
Call and See Them

The Broadway Store

ince for March totalled 374,027 tons, a slight increase over the production for March, 1933.

MOTOR CAR LICENSES

About 60,000 passenger motor car licenses have been issued to date, while truck licenses to April 30, numbered about 10,000.

LIVE STOCK PRODUCTS

EQUAL WHEAT

Value of live stock and live stock products in Alberta last year was slightly more than the value of the wheat crop was placed at \$27,745,000 while the value of live stock slaughtered and sold, wool clip, dairy products and poultry was \$38,000,000.

NEW COW-TESTING PLAN

A dairy herd testing scheme has been put into effect by the provincial department of Agriculture to take the place of the scheme carried on for some years by the dominion government, but cancelled last year. Under the new provincial scheme, provision will be made whereby each farmer operating a dairy herd may keep records of each of his cows, and have samples of milk tested every two months for butterfat content. The department will pay cost of transportation of the samples and will provide periodic reports on the herd from which the samples come. Application forms under the new plan are being sent this month to all members of former cow-testing associations and to others from whom enquiries have been received. The new plan will make

"NOT CONSTIPATED FOR SEVEN WEEKS"

Writes Mrs. Johnson After Using Kellogg's ALL-BRAN

Sufferers from constipation will be interested in this unsolicited letter:

"Your ALL-BRAN surely relieves constipation. I am so glad over the good it has done me that I feel I must write and tell you of it."

"For lunch I take a banana, a large one. Six tablespoons of ALL-BRAN in a sauce dish, and dip banana at each bite until all is consumed. I haven't been constipated now for seven weeks."—Mrs. Louise Johnson (address furnished upon request).

Constipation often causes headaches, loss of appetite and energy, sleeplessness. This condition is usually due to lack of "bulk" to exercise the intestines, and vitamin B to further promote regular habits. Kellogg's ALL-BRAN has both, as well as iron for the blood.

The "bulk" in ALL-BRAN is much like that in leafy vegetables. Within the body, it forms a soft mass. Gently, it clears out the wastes.

Try ALL-BRAN in place of patent medicines — often harmful. Two tablespoons daily will overcome most types of constipation. Chronic cases, with each meal. If not relieved this way, see your doctor.

Use as a cereal, or in cooking. Recipes on the red-and-green package. Sold by all grocers. Made by Kellogg in London, Ontario.

possible continuance of the check upon the performance in production of dairy cows in the province.

Mr. McAllister of the General
Electric Co., was a Raymond
visitor today, Thursday.

A nice shower of rain again
Tuesday night refreshed field
and gardens. The cool of the
storm was a welcome relief
after two days of sweltering
heat.

Just after the storm Satur-
day evening a team tied to the
telephone pole in front of the
Mercantile's Lumber shed start-
ed wrapping the buggy tongue
around the pole. Part of a wrap
was aright but after that the
tongue was broken out of the
rig, the harness broken in a
pace or two, and the buggy
damaged. No one was with the
team, but they were soon loos-
ened from the rig.

Dick Higgins, 19, of Warner
was fatally injured Tuesday eve-
ning about 6:30 when a team
ran away with a wagon in which
he was hauling fuel oil, fractur-
ing his skull, and inflicting
other injuries. He breathed
his last as he was being trans-
ferred from a car to the Doc-
tor's office in Warner.

The regular meeting of the
"Bonne Amie" Club met at the
home of Mrs. R. Tollestrup, two
visitors being present Mrs. A.
G. Kirkham and Mrs. Walter
Zobelle. A quilt was put on and
the ladies sewed all afternoon
finishing it. A delicious chicken
dinner was served by the hostess
assisted by her daughter Lav-
onne and Miss Ella Zobel.

Mr and Mrs A. V. Palmer of
Wrentham spent Sunday after-
noon and evening with relative
and friends in Raymond.

Radio reports Tuesday even-
ing stated that Tuesday was one
of the meanest days on record
with no rain on the continent.
It rained here later.

Mr. and Mrs. G. A. Johnson
and family, and Mr. and Mrs.
Wm. E. LaPearle are visiting
Mr. and Mrs. F. B. Rolison, par-
ents of Mrs. Johnson and Mrs.
LaPearle.

Hamp Witbeck is re-arranging
and building onto his house.
When completed it will be a
nice improvement to his prop-
erty.

Quite a number of local peo-
ple were over to Craddock on
Sunday to view the train wreck
of oil tank cars which occur-
red there they reported it as
quite a sight.

Priesthood and Board Meet-
ings on Sunday were well at-
tended, all wards and branches
in the Stake being well repre-
sented.

The Taylor Stake Track Meet
will be held Next Monday, June
4th, at Stirling. To date there
has not been much noise about
this event.

Posters are out now announ-
cing Raymond's 25th celebra-
tion for Dominion Day July 2nd.
Plan to be at home and invite
your friends to come and spend
the day with you.

A Human Tendency

Too few business firms employ adver-
tising to lessen their costs of selling.

Business enterprise today has two
major problems: 1. To increase sales;
2. To lessen the cost of selling. Yet so
many omit the use of advertising, despite
their readiness to agree to the proposition
that "advertising lessens the cost of
selling."

We're frankly amazed at the avoid-
ance of advertising in the face of the
knowledge that it costs less to sell with
the assistance of advertising than without
it.

Strange, strange--- this human tend-
ency to go contrary to what knowledge
and experience has taught us is right!

To lessen your cost of selling, we
commend to you an adequate campaign
of regular advertising in . . .
